Books Lakehouse Overview

Publication Period: Jan 01, 1995 ~ Dec 31, 2004

📚 Books Lakehouse Dashboard

What this shows — the Book-Crossing lakehouse, stage by stage. Bronze ingests the raw CSVs, silver validates each row (bad rows are quarantined, not dropped), and gold joins validated books with their rating stats via a metric view.
How to use it — slice every widget with the filters above: publication period (default 1995–2004), author, publisher, and country. The rankings average explicit ratings (1–10 scale, implicit 0 ratings excluded, books with ≥100 explicit ratings only); the user tables list the 10 most active raters and the 10 "highest buyers" (all ratings incl. implicit); and the bottom bar charts show how many rows survive each pipeline layer.

Publication Period: 01/01/1995 – 12/31/2004

Author: All

Publisher: All
